Faker press is installed for important three things. Creating fake post,comment and users.

Database part.

The screenshot displays the phpMyAdmin web interface in a browser window. The address bar shows the URL: `localhost8888/phpMyAdmin/db_structure.php?server=1&db=mark`. The interface includes a sidebar on the left with a tree view of databases and tables. The main panel shows the 'Structure' tab for the 'mark' database, listing 12 tables. A summary row at the bottom indicates a total of 328 rows across all tables.
